Bulb Energy - Energy Specialist
Intelling Ltd - NHS Track & Trace Customer Associate
First Recruitment Group - Recruitment Consultant
FourPointZero Recruitment - Recruitment Consultant

Jan 2021 – March 2022
May 2020 – Jan 2021
Aug 2019 – March 2020
Sep 2018 – Feb 2019

Over 3 years' experience with a diverse background in customer-facing roles. Gained strong communication and problem-solving skills honed through experience in positions in the energy and healthcare sectors.

Gained experience in new business development, client relationship building, and process and project management through building a pipeline in the recruitment industry. Strong stakeholder engagement skills gained through interacting with individuals across various industries and at different levels within an organisation.

Proven ability to adapt and quickly learn industry-specific content and a track record of working well under pressure to hit targets and key performance metrics.

PROJECTS

Crwn-Clothing - E-Commerce Website – React, Redux, TypeScript, Sass, Stripe, Firebase, Netlify, Jest, Enzyme

- Built an e-commerce website where users can login, add items to cart, checkout and more.
- Login – basic authentication and Google Sign-In through integration with Firebase.
- Integration with Stripe API for payments.
- Redux for state management of application.
- Deployed through Netlify.
- Testing with Jest & Enzyme.

Smart-Brain - Facial Recognition Application – React, Tachyons, Clarifai API, Node, Express, PostgreSQL, Heroku

- Built a facial recognition project, where users can login, upload an image and the faces in the images will be recognised and highlighted. UI built in React.
- Built back end server in Node and Express to communicate with PostgreSQL database to authenticate users and store other user information.
- Facial Recognition is done through integration with the Clarifai API. Face location is identified and then styling applied to put a small box around the faces that have been detected.
- Application keeps track of users & how many times they have used the application to detect faces. Users are given a score.
- Deployed through Heroku.

Dataset-Generator Gadget – React, Tachyons, eGain REST API's, Webpack

- Built a report dataset generator tool where users can create a mock dataset based on report models.
- Datasets are sent and stored in eGain Analytics application through use of eGain API's to generate reports for demo purposes.
- Datasets can be pulled back into gadget and edited, updated & deleted.
- Calculator tool built into the gadget so aggregations for report attributes can be calculated.
- Tooltip within the gadget to advise users on how to use the tool.

Extended CV detailing previous experience duties is available if required.
